Choose Your Event Extras

Events are the primary drivers for member engagement, networking, community building, and, for 63% of organizations, a core, essential income stream. Events, including annual conferences, workshops, and seminars, are critical for delivering value, facilitating professional development, and enabling industry advocacy.

Key trends shaping the future of association events:

- Experience-led event design

Audiences expect more than information. Focus on storytelling, atmosphere, and interaction to create memorable experiences that resonate beyond the venue.

- Smarter use of event technology

From advanced audiovisual setups to seamless hybrid and virtual integrations, technology will play a critical role in engagement, scalability, and reliability. High-quality production is no longer optional; it is expected.

- Data-driven planning and execution

Event success is increasingly measured through data. Attendance analytics, engagement metrics, and post-event insights are helping organisations refine strategies and demonstrate return on investment and value
